We are a creator of zero emission energy solutions

Who are we?

The new Enersense emerged in the summer of 2020 when three industry pioneers merged. We are a group of professionals from different fields whose competence and bold attitude our customers rely on.

What we do?

We build sustainable energy solutions and a clean future for society, together as a partner for our customers in industrial field. We transmit know-how, provide sustainable solutions and ensure a quality outcome for all projects in construction and industry, be they day-long or years-long.

How we work?

We find the right talent in the right place and bring peace of mind to the client at every stage of the project. We work together, valuing each other, and provide professionals with opportunities for growth and development in their careers.

Why?

We feel pride in our people whose skills and competence ensure the success of the project for the customer. Together, we build a safe and sustainable world for all of us.

CASE

Olkiluoto 3 NPP

- We have been one of the largest resource providers throughout the project to all major contractors onsite.
- We have managed the whole supply chain's liability documentation and we have audited all the companies working on the site.
